## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: A sensing arrangement was not found or suggested by the prior art comprising feedback circuitry connecting an input and output node wherein the amplifier gain at the input node is varied to maintain a level at the output node and produces a signal when it receives one or more charged particles or quanta of radiation. Furthermore, such a device was not found comprising a current mirror or readout circuit. Also, a sensor fabricated on a common substrate arranged to discriminate between the arrival of single and multiple quanta of radiation was not found or suggested. A method of detecting according to said sensor was not found, and an array of said sensor or macropixel comprising said sensors was also not found or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4,866,400 A1, US 6,759,658 B2, US 2004/0094720 A1, US
